

Great Basin™

GAS TRANSMISSION COMPANY

Great Basin Gas Transmission Company (Great Basin) plans to expand its existing natural gas pipeline infrastructure to support significant growth and increasing energy demand in northern Nevada.

The proposed **Great Basin 2028 Expansion Project** (the Project) will enhance the availability of reliable, on-demand energy by building on Great Basin's existing approximately 898-mile natural gas transmission system.

Natural gas is a critical component of Nevada's energy system, providing a safe, reliable, and affordable energy source for homes, businesses, industry, and electric generation.

For decades, Great Basin (formerly known as Paiute Pipeline Company) has safely operated and maintained its system, delivering dependable service that supports regional energy reliability and economic development.

Great Basin 2028 Expansion Project

Strengthening Energy Reliability for Northern Nevada

- Supports reliable energy for homes, businesses, and essential services in our communities
- Helps communities prepare for growth with long-term infrastructure planning
- Creates construction-related employment and demand for local services over multiple Project years
- Primarily co-located with existing utilities and roadways to reduce new land impacts

Project Snapshot

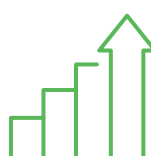

Expanded Natural Gas Infrastructure

Installation of approximately **230 miles of natural gas pipeline** and associated facilities, one new compressor station, and modifications to existing infrastructure.

Phased Development

The Project is currently in the **Planning & Development Phase** with an anticipated in service date of November 2028.

Increased Capacity

Adds up to approximately **948,000 dekatherms** per day of new natural gas transportation capacity to meet the growing demand for reliable, resilient and on-demand energy in Northern Nevada.

Federally Regulated

The Project is subject to approval from the **Federal Energy Regulatory Commission (FERC)**, the lead federal agency overseeing review of the Project.

Project Location

The Project will be located entirely in northwestern Nevada, spanning from Winnemucca to west of Fernley, within the following counties:

- Humboldt County
- Washoe County
- Pershing County
- Storey County
- Churchill County
- Lyon County

The preliminary route is approximately 74% co-located with Great Basin’s existing facilities or other existing utilities and roadways.

Site-specific locations of aboveground facilities, contractor sites, and temporary workspaces are currently in development.

Project Timeline

2026

- Begin FERC Pre-Filing Process
- Hold public open houses
- Perform environmental and cultural field surveys
- Begin FERC National Environmental Policy Act (NEPA) environmental review process
- Submit FERC application

2027

- Continue FERC NEPA environmental review process

2028

- Construction underway upon receiving approval from FERC
- Target in service date of November 2028

2029

- Project concludes and infrastructure is complete
- Great Basin will discuss with FERC the abandonment of pipeline and compressor station facilities that are no longer necessary after the Project is placed into service

Great Basin™
GAS TRANSMISSION COMPANY

About Great Basin Gas Transmission Company

Great Basin Gas Transmission Company (Great Basin), formerly known as Paiute Pipeline Company, is a wholly owned subsidiary of Southwest Gas Corporation. Great Basin owns and operates an interstate pipeline system which extends from the Idaho-Nevada border to the Nevada-California border. The Great Basin system also includes a liquefied natural gas peak shaving facility located near Lovelock, Nevada. Great Basin is a natural gas company subject to the jurisdiction of the Federal Energy Regulatory Commission under the Natural Gas Act.
